Profile

I'm a computer scientist skilled in algorithm design, problem-solving, and programming languages, with expertise in data structures, computational theory, and software development methodologies. A motivated critical thinker, I excel in logical reasoning, adaptability, creativity, and continuous learning. Experienced in all stages of advanced software development, including design, installation, testing, and maintenance. Proficient in Java, React, C++, JavaScript, MySQL Server, and more. Effective in both independent projects and team collaboration.
